## Exporting "All data (all records and fields)"

Select your export settings, which includes the export format (Excel/CSV, SAS, SPSS, R, Stata) and if you wish to perform

### Choose export format

☒  CSV / Microsoft Excel (raw data)

☐  CSV / Microsoft Excel (labels)

☐  SPSS Statistical Software

☐  SAS Statistical Software

☐  R Statistical Software

☐  Stata Statistical Software

☐  CDISC ODM (XML)

### De-identification options (optional)

The options below allow you to limit the amount of sensitive information that you are exporting out of the project. Check all that apply.

**Known Identifiers:**

☐ Remove All Identifier Fields (tagged in Data Dictionary)

☐ Hash the Record ID field (converts record name to an unrecognizable value)

**Free-form text:**

☐ Remove unvalidated Text fields (i.e. Text fields other than dates, numbers, etc.)

☐ Remove Notes/Essay box fields

**Date and datetime fields:**

☐ Remove all date and datetime fields

— OR —

☐ Shift all dates by value between 0 and 364 days (shifted amount determined by algorithm for each record)  
[What is date shifting?](#)

### Main project settings

Complete!

Not complete?

Enable

Use surveys in this project? [?]

VIDEO: How to create and manage a survey

Disable

Use longitudinal data collection with defined events? [?]

Enable

Use the MyCap participant-facing mobile app? [?]

Learn more about MyCap

Modify project title, purpose, etc.

### Design your data collection instruments

Complete!

Not complete?

Add or edit fields on your data collection instruments. This may be done by either using the Online Designer (online method) or by uploading a Data Dictionary (offline method). Quick links: [Download PDF of all instruments](#) OR [Download the current Data Dictionary](#)

Go to Online Designer

or

Data Dictionary

Explore the REDCap Instrument Library

Have you checked the [Check For Identifiers](#) page to ensure all identifier fields have been tagged?

### Move Project To Production Status?

Are you sure you wish to leave the DEVELOPMENT stage? If you proceed, the project will be moved to PRODUCTION status so that real data may be collected. If you select the 'Delete ALL data' option below, all current collected data, calendar events, and uploaded documents will be deleted, otherwise all will remain untouched as the project is moved to production.

★ Have you checked the [Check For Identifiers](#) page to ensure all identifier fields have been tagged?

#### Keep existing data or delete?

- ☒ Keep ALL data saved so far. **(1 records)**
- ☐ Delete ALL data in the project (including any survey responses), calendar events, documents uploaded onto forms/surveys, and all archived data export files stored in the File Repository, and any logged events that pertain to data collection.

Once in production, you will not be able to edit the project fields in real time anymore. However, you can make edits in Draft Mode, which will be auto-approved or else might need to be approved by a REDCap administrator before taking effect.

YES, Move to Production Status

Cancel

to Move project to production

### ✓ Data export was successful!

The data export was successful, and your data is now ready to be downloaded. Click the download icon(s) below on the right to download your data file. If exporting to a specific statistical analysis package, you will additionally need to download the syntax file that is provided for that stats package. For more details, follow the instructions in the box below.

#### 📖 How to cite publications

When publishing manuscripts relating to this REDCap project, we ask that in your publication you please cite the items listed below that have been utilized in this project. Thank you!

1. Please cite the **official REDCap publications**. [View citation and template methods language](#)

#### REDCap Project (XML)

This XML file can be used to create a clone of the project (including its data, optionally) on this REDCap server or on another REDCap server (it can be uploaded on the Create New Project page). Because it is in CDISC ODM format, it can also be used to import the project into another ODM-compatible system.
